What they say about Aida & Co.

Having recently received the [Forbes Five Star Award](#), I reflect back on all the elements it took to open **Montage Beverly Hills** just twelve short months ago. The attention to detail is **Montage Beverly Hills'** number one goal. **Aida & Company** was a pleasure to work with because of their similar intensity with regards to detail. Allan and Aida were not only involved in many of our products from start to finish, but also very patient with the many changes we had until they were perfect. When working with such professional talent who shows the same passion that we do for each product, it makes the process that much more satisfying and enjoyable.
